International orientation

Our firm has a unique international orientation as the vast majority of our clientele consists of international companies. We have a unique know-how in advising foreign clients in their business in Greece and navigating them through the intricacies and practices of the Greek regulatory and business environment. We are the exclusive member to a number of prominent networks of law firms, including Lex Mundi and Taxand. Furthermore, we work with international law firms in more than 75 jurisdictions, including the USA, UK, France, Germany, Spain, Italy, Switzerland, Belgium, Luxembourg, the Netherlands, Cyprus, Serbia, Poland, China, Japan and more.

TAXAND

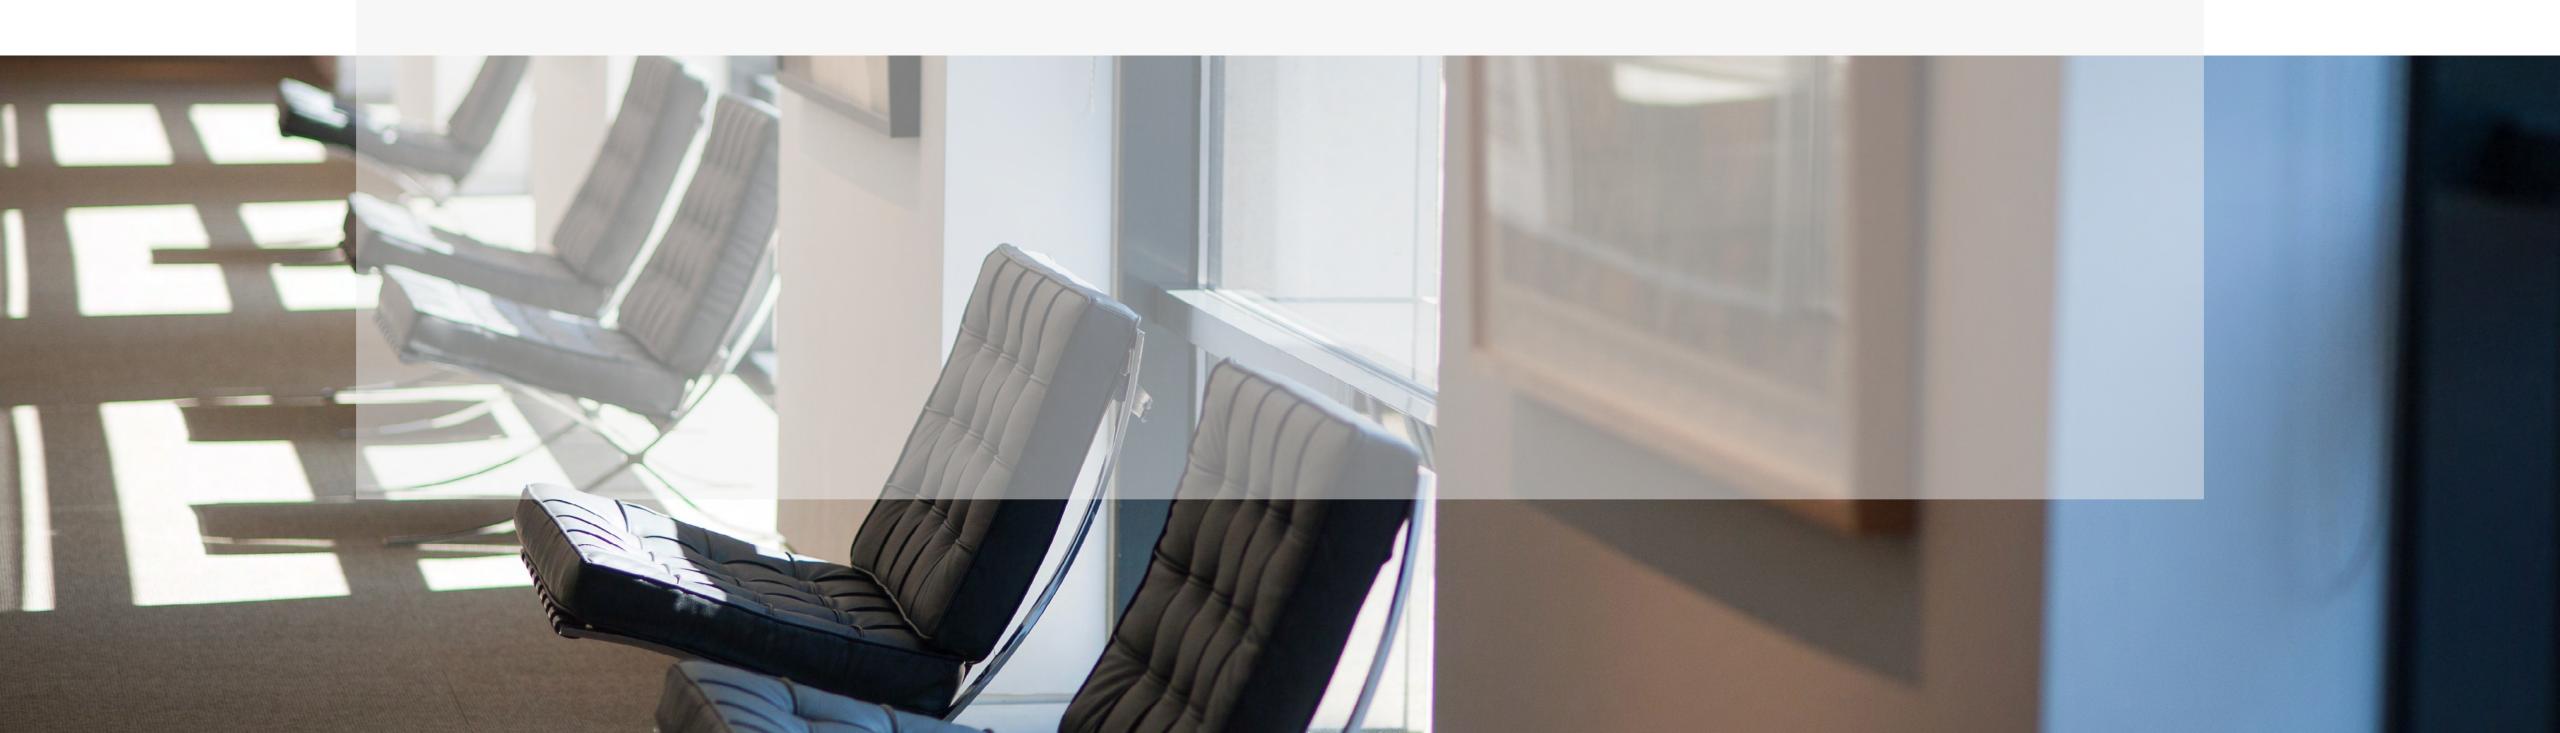

Transparency and business ethics

Our firm is fully committed to transparency and practices which promote business ethics.

Zepos & Yannopoulos is the corresponding firm in Greece for Trace, a non-profit association providing anti-bribery support www.traceinternational.org

Our managing team

Our management structure has been created with one goal in mind: to shape and lead our sector. To that end, the executive committee, chaired by the firm's managing and co-managing partners, sets the firm's strategy and oversees its implementation. Appropriate measures in terms of succession planning have been put in place in order to assure effective management under all circumstances.

Our management team has visibility into the organisation's regulatory requirements and stakeholders' expectations. They define business policies and procedures and align them with the organisation's business objectives and strategic plans. They empower all teams and make them responsible for effective operation of the organisation's business continuity.

Greece enacts changes in the recently established Grid Connection Offers Priority Regime

Just a few months after the initial grid priorities regime was introduced on the basis of the provisions of Law 4951/2022, several amendments were inaugurated by virtue of a Decision of the Minister of Environment and Energy enacted on 20 January 2023¹ (the New Grid **Priority MD**). The New Grid Priority MD provides inter alia, for the enhanced capacity for the application of Power Purchase Agreements (the PPAs), incentives to storage projects, and adjustments to the capacity of specific prioritisation categories.

ion YREN/AAREEK/7062/374 (Government Gazette 2758'/20.01.2023)

The main changes introduced by the New Grid Priority MD, are as follows: • It amends the provided capacity for projects falling into prioritisation subcategories A4, A6a, A9 and A10, category B, and subcategories C3, C4 and C6, while modifying the curtailment and the limitation of capacity for projects subject to subcategory A5 (i.e., RE5 projects with built in electricity storage stations). It should be noted that, especially for stations falling into category B that will conclude or have already concluded PPAs, the available capacity has been massively increased

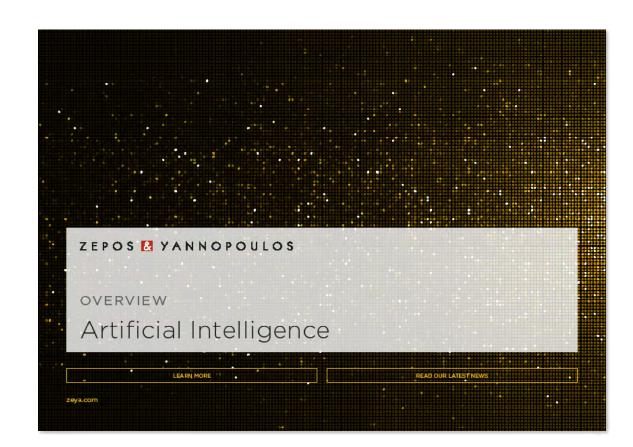

thus for the further deployment of PPA related investment plans (e.g., with industrial consumers).
It adds a brand-new prioritisation subcategory numbered A6b, while renaming existing subcategory A6 into subcategory A6a. New A6b subcategory provides for a capacity of 250 MW and a curtailment percentage of 20%, solely for wind farms adjacent to the Greek borders (up to 30 km).
It introduces adjustments to the process of examining applications for a Final Grid Connection Offer (the FGCO) by IPTO by providing for the

from 1,500 to 4,000 MW, allowing
